

Independent Pharmacy

QS/1

Independent Pharmacy Solutions

Today's independent pharmacies face tough challenges – surging demand, elusive profit margins, increased competition – and all with fewer pharmacists. At QS/1[®], we understand the difficulties pharmacies face every day. That's why we created the NRx[®] Pharmacy Management System.

Based on years of pharmacy experience, NRx makes processing new prescriptions and filling refills quick and easy. With the system's unique InstantFill[™] functionality, refills are automatically sent for adjudication and dispensing without pharmacist intervention. And, you can create a customized refill reminder program to improve customer compliance and offer superior customer service.

Complete many tasks such as processing claims, reporting, managing inventory and maintaining and updating data in just a few mouse clicks or keystrokes. Shorten the learning curve for training new staff with onscreen context-sensitive Help and easy access to a variety of training materials, including step-by-step instructional wizards and webinars that demonstrate the latest enhancements.

Qty	Rx Number	Patient Name	Date	Status	Message
1	10011111	JONES, JANE	01/15/11	Fill	
1	10011112	JONES, JANE	01/15/11	Fill

Increase Productivity and Profitability with Optional QS/1 Products and Services

Workflow

Improve patient safety and streamline day-to-day operations with QS/1's integrated Workflow module. Implement a quality assurance check station with NDC verification and optional pill images. Create an error resolution area for dealing with prescription filling issues like third party rejections or doctor refill authorizations.

Document Imaging

Reduce your pharmacy's document management and storage requirements with QS/1's Document Imaging module. Simply scan hard copy documents like prescriptions, driver's licenses and insurance cards to create digital files and store them within your QS/1 Pharmacy Management System.

Electronic Signature Capture

Capture third party and HIPAA signatures as well as gather acknowledgement of privacy practices and acceptance or refusal of counseling or safety caps with QS/1's integrated Electronic Signature Capture.

Central Databases

Pharmacies with more than one location can easily add patients and transfer prescriptions with QS/1's Central Profiles module. With the central database, multi-location pharmacies share doctor and drug files, and give patients the added reassurance of interaction checking at all locations. Pharmacists and technicians work from a central employee file giving them the ability to work at any location while using the same password.

NRx Nursing Home

Serving nursing homes' complex medication needs is easier with QS/1's NRx Nursing Home module. Its helpful tools and reports are tailored specifically for retail pharmacies that support the medication requirements of nursing homes or assisted living facilities.

Accounts Receivable

Post charges to payments, view payment histories, automate payment postings, view current and post A/R records and more with QS/1's Accounts Receivable module. Get the tools to handle collections internally and automatically alert employees of customers who have exceeded their credit limit, previously written a bad check or have an account in collection. Access pre-designed reports and statements for Days Sales Outstanding, Aged Receivable by patient and/or carrier, Trial Balances by patient and/or carrier and more.

Interactive Voice Response (IVR)

Improve accuracy and create a less stressful work environment with QS/1's IVR. Maximize efficiency by storing customer messages directly in your QS/1 Pharmacy Management System for access from any workstation. With refill requests directly routed to your processing queue, store productivity will benefit from the system's smooth and seamless integration. And your customers will appreciate the convenience of ordering refills from your pharmacy 24 hours a day, 7 days a week.

Point-of-Sale

Boost your front-end's bottom-line revenue with QS/1's integrated Point-of-Sale. IIAS and PCI-compliant, the system can help you better manage pricing, inventory and security, as well as improve and add more customer checkout options. Enjoy the benefits of an integrated storewide management system.

SystemOne® for HME

Turn your HME department into a profit center with SystemOne. With tools for better inventory and rental management, the system also simplifies HME claims and billing by alerting you to costly errors before they happen. And in the event of an audit, SystemOne provides complete compliance and documentation for Medicare regulations.

Interfaces

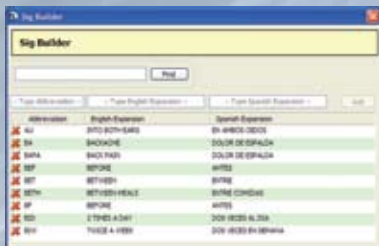

With existing interfaces to most automated dispensing and packaging systems, e-Prescribe, IVR and billing systems, QS/1 can connect you to many productivity-boosting tools designed to improve daily workflow and keep your pharmacies competitive. Visit www.qs1.com for a complete listing of interfaces.

Mail Order

Save maintenance prescription customers a trip to the pharmacy. Ensure customers don't miss a dose by shipping prescriptions before they run out. For complete record keeping of higher volume mail order, use our UPS shipping interface to scan the tracking number into the transaction.

Clinical Updates

Keep your clinical information accurate and current with automatic clinical updates from QS/1. You can receive quarterly updates of critical clinical data including contraindication codes, generic indicators, NH therapeutic class and units per day. With Internet access you can receive real-time updates. Provide patients with handy, take home patient monographs detailing potential side effects, precautions and dosages. Add French and Spanish language patient monographs to provide non-English speaking patients with up-to-date information on their prescriptions.

Images and Imprints

Reduce errors with Images and Imprints, the QS/1 service that provides images for nearly 20,000 drugs.

Ensure the highest levels of patient safety and help eliminate potential dispensing confusion with drug images displayed on screen as prescriptions are dispensed.

Price Updates

With up to 10 percent of drug prices changing every day, you can protect your bottom line with daily or weekly electronic price updates from QS/1. Automatically update data including manufacturers, package sizes, competitive pricing, MAC pricing, net wholesale acquisition and state codes.

Web Services

Let QS/1 provide you with your own pharmacy website or expand the functionality of your existing website. Easily offer customers the convenience of online refills along with premium consumer and clinical health content.

Gain Greater IT Control with Enterprise

QS/1's Enterprise solution allows up to 256 pharmacies to reside on a single server, eliminating the need to maintain multiple servers at different locations. Transmit all claims from the same central location to improve efficiency and reduce communication costs. Protect your stores' data with centralized backups, data maintenance and multiple security levels.

NRx OnDemand

Reduce computer maintenance in your pharmacy with NRx OnDemand. Gain all the benefits of NRx but leave all computer maintenance, software upgrades, security backups and general server maintenance to QS/1. Plus, all pharmacy data is stored in redundant data centers, which will prevent loss of valuable data due to power outages, network or equipment failures.

Proven Provider

With QS/1, you're gaining more than a full-featured pharmacy management system. We have research and development expertise that reaches back more than 30 years. And we provide service and support from our staff of more than 550 professionals in 22 offices across North America. With QS/1, you'll gain a proven provider and partner for your pharmacy.
